CONDITION OF THE MARKETS

Fairly Free Selling Results in Lower Prices All Around for Wheat Options.

A Decline of 1 1-2 Cents for May and June and a Fraction More for July-Corn Active-Oats Firm and Higher-Provisions Dull.

MONEY, STOCKS AND BONDS,

Sugar Trust Certificates Still on the Upward Bound-The General List Much Stronger. NEW YORK, May 13.-Money on call was easy, ranging from 3 to 8 per cent., the last loan being made at 3, closing offered

Prime mercantile paper 434 @7 per cent. Sterling exchange quiet and steady at \$4.844 for sixty-day bills and \$4.864 for

The total sales of stocks to-day were 411,-254 shares, including the following: Atchison, 24,785; Canada Southern, 14,660; Delaware, Lackawanna & Western, 16,320; Delaware, Lackawanna & Hudson, 3,450; Lake Shore, 4,405; Louisville & Nashville, 8,040; Missouri Pacific, 18,835; Oregon Transcontinental, 6,490; Pacific Mail, 5,110; Reading, 6,900; Richmond & West Point, 15,855; St. Paul, 15,600; Texas Pacific, 6,950; Union Pacific, 15,970; Western Union, 6,432.

instead of the weakness there was decided strength in all portions of the list, and late in the day even buoyancy marked the dealings. There was no lack of the disquieting news from the West this morning, and while there seemed to be a disposition to regard the whole thing as grossly exaggerated by the dispatches, a feeling of hesitancy was shown, which did not wear entirely away until late in the day, when the activity became equal to anything yet seen on the present rise. The Chicago people supported their advices of rate-cutting and railroad demoralization in general with orders to sell the granger stocks, but London was a buyer, and commission houses were liberally supplied with orders to buy, which made themselves felt at the very outset, and while the opening itself was rather hesitating and very irregular, prices were soon on the upward tack and a strong tone marked the dealings from that time out. The flurry in money was not re-peated though the rates were run up to as high as 8 per cent. in the middle of the day. They could not be kept there, however, and the last loans were made at 3 per cent., with that rate offered at the close. The most important influence in creating the buoyant tone to the market was the persistent buying of the industrial stocks, and Sugar was bought heavily, scoring a rise of over 4 per cent. at its best figure. Mr. Keene is believed to be the most active manipulator of the certificates, and while the room traders follow him rather timidly the buying was of such a pronounced character that nothing could resist the strength of the upward movement. The only strong feature of the forenoon was the coal stocks, which again made material advances, though the two active stocks-Reading and Lackawanna—were not so pronounced in their movements as the inactive ones— Jersey Central and Delaware & Hudson. The Vanderbilts were strong but not prominent in the dealings, and their movements were in all cases measured by small fractions. London bought most of its favorites, though there was some selling of Union Pacific and the grangers for foreign account, especially in the forenoon, but this was reversed in the afternoon. The buying became general in the last hour, and the rush to cover by "shorts" sent everything on the list up rapidly. Richmond & West Point becoming one of the most prominent strong features of the market at the time. The close was very active and strong at about the best figures of the day in most cases. A decline of 1 per cent. in Manhattan was the only important loss, while Sugar rose 44; Delaware & Hudson and Tennessee Coal, 212 each; Pacific Mail, 11s; Richmond & West Point, 11s, and the preferred, 15s; LaClede Gas, 15s; Chicago Gas, 112; Rock Island, 13s; Lackawanna, Ohio & Mississippi each 114; East Tennessee first proferred, 11s, and others fractional amounts.

Railroad bonds were not so active to-day, but the trading extended to \$1,945,000, with the Atlantic & Pacific issues, the Atchison issues, and the Texas Pacific issues most prominent for activity. The market was again rather hesitating, and the final changes are in but few cases of special importance, though the losses are rare. The Atlantic & Pacific issues were the strong feature, and the incomes rose 2 to 21. Government bonds were dull and steady. State bonds were dull and steady. Closing

TRADING AT CHICAGO.

Wheat Lower All Around-Corn Active and a Fraction Off-Oats Higher. CHICAGO, May 13.-There was only a moderate trading in wheat to-day. Most of it was local. Operators were rather inclined to the selling side, but were reluctant about going "short" for fear the market might advance, the conditions being such that the market is easily controlled. A prominent trader was reported as being a rather free seller, and the "bull" interest sold moderately, realizing on their holdings. At the same time there was fair buying on the various breaks, and the market was held within moderate range. The opening was easy at about yesterday's closing for July, declined, with only slight fluctuations, 2c, then advanced 7sc, again eased off, fluctuated some and closed about 15s@134c lower than yesterday. May was very quiet and closed 112c lower and June 112c lower. There was nothing special in outside news to affect the course of the market. There was a large business transacted in corn within narrow limits. and the feeling was a little unsettled, though generally steady. There was nothing new of consequence developed, and prices were governed mainly by local influences, chiefly by the operations of a prominent local trader. There was a good demand for cash and May, and the premium of July over this month was reduced at one time to 146 4c. The market opened excited and higher, first sales varying considerably in different parts of the pit, but afterwards sold off 3c, ruled steader, and closed a shade lower than yesterday. Oats were traded in fairly early, but the latter part of the session was marked by quietness. A firmer feeling prevailed, especially on the near futures. May advanced \(\frac{1}{2}c\), 3de 3se; mixed, spot, 143c asked; on the near futures. May advanced \(\frac{1}{2}c\), 3de 3se; graded on the near futures. May advanced \(\frac{1}{2}c\), 3de 3se; western white, 3de 3se; fluctuated frequently within a range of \(\frac{1}{2}c\), and at one time sold at \(\frac{1}{2}c\) above the closed in faires of yesterday, but closed with \(\frac{1}{2}c\) and the conditions of the trading was in July and prices fluctuated frequently within a range of \(\frac{1}{2}c\), and at one time sold at \(\frac{1}{2}c\) above the closed in pork. The feeling was easy, with prices in mixed, spot, 142 and attracted very little attention. There were no price changes. time to 18@ 4c. The market opened ex-

Only a fair trade was reported in short ribs and the changes were very slight. The leading futures ranged as follows:

Openi'g. Highest. | Lowest. | Closing 94¹2 94 94 94 34³4 35¹4 28 26³4 26¹8 Wheat-May .. 26¹ \$12.80 12.80 26¹2 \$12.85 Pork-May ... \$12.80 12.90 13.10 12.90 13.10 13.00 June.... July.... Sh'rt ribs-May 6.40 6.4212 5.35 5.35 5.40

CHARLESTON, May 13.-Turpentine quiet at SAVANNAH, May 13.-Turpentine firm at

Dry Goods. NEW YORK, May 13.—There was a fair de-mand for dry goods in the regular way, with a

mand for dry goods in the regular way, with a firm market, but the attention of buyers was chiefly taken up with the trade sale of flannels, which began to-day by order of Faulkner, Page & Co., and which was attended by buyers from all sections. The sale was looked to with special interest, because the goods have heretofore been the leaders in making prices for the season. The results are not very different, on the average, from the sale of last Friday, but prices were more irregular, some goods, as plain whites. more irregular, some goods, as plain whites, selling close to last year's figures, while plain scarlets and sockings sold very low in some instances. Twills varied from 5 to 10 per cent. decline. The results were not very satisfactory to sellers, but probably a fair expression of the condition of things was reached by the trade, confidence in the most desirable goods being affirmed. Among the Western houses represented at the sale were Haven. Geddes & Co., Terre Haute, Ind., and Murphy, Hibben & Co., Indianapolis.

NEW YORK, May 13.-Cotton easier; middling uplands, 12c; middling Orleans, 12 3-16c; sales, 513 bales. Futures closed steady; sales, 63,000 bales; May and June, 11.98c; July, 11.99c; August, 11.96c; September, 11.39c; October, 10.89c; November, 10.71c; December, 10.70c; January, 10.73c; February, 10.78c. NEW ORLEANS, May 13.—Cotton firm; middling, 115sc; low middling, 113sc; good ordinary, 111-16c; net receipts, 4,311 bales; gross receipts, 4,468 bales; sales, 750 bales; stock, 68,395 bales.

INDIANAPOLIS MARKETS.

Trade a Little Off-Warmer Weather Needed to Stimulate Business.

INDIANAPOLIS, May 13. Trade in most departments to-day was a little slow. The dry-goods men reported but few buyers in. In prices there were no changes, all lines of dry goods ruling firm. Grocers report only a fair trade with prices steady. The bears are still working the coffee market East and may yet effect further reductions. Sugars rule firm. Canned goods meet with better sale than usual in May on account of the lateness of strawberries, cranberries and other May fruits getting on to the market. The produce men report business as being quiet from the fact that they have little to sell, receipts of all articles they usually handle at this season of the year being light. Poultry is firm at the advance of Monday. Eggs, as well, are in good request at quotations. The butter market is getting over-stocked and only good butter sells readily. The hide market is hardly as active as last month; prices, however, rule steady and firm. The flour market is active at better prices, yet millers are not pushing produc-tion so difficult is it to get milling grades tion, so difficult is it to get milling grades of wheat. Trade with the seed men is slowing down; they have had two months, however, of the best business they have ever experienced in this market. No branch of business has developed more rapidly into large proportions than has this in the last three years. Other markets are without feature.

The local market continues strong in tone. Receipts are still light, although beavier than a few days ago. Millers complain of experiencing trouble in getting the grades of wheat that they want, and none of the mills are being run to their full capacity. Track bids to-day ruled as follows:

Wheat-No. 2 red, 954c; sales of No. 3 red at 9012c; rejected, 80c; unmerchantable, 60

Corn-No. 1 white, 3512c; No. 2 white, 3512c; No. 3 white, 35¹4c; No. 4 white, 34c; No. 2 yellow, 35c; No. 3 yellow, 34c; No. 4 yellow, 33c; No. 2 mixed, 34c; No. 3 mixed, 33¹2c; No. 4 mixed, 29@30c; mixed ear, 34c; yellow, 35c; white, 34@35c, latter for one color. Oats-No. 2 white, 29c; No. 3 white, 2812c; No. 2 mixed, 2712c; rejected, 2512c. Bran-Local dealers are bidding \$11; shippers bidding \$11 for prompt shipment. Hay—Timothy, choice, \$13; No. 1, \$12; No. 2, \$8@9 No. 1 prairie, \$5.50.

Hil-genberger, trustee, lots 1 and 2, in Daggy's subdivision of part of out-Hugh T. Bowers to Joseph H. Clark, lot 169, in Clark's third addition to 700.00

West Indianapolis..... 350.00 Conveyances, 9; consideration....\$10,900.00 Jersey Milk. Jersey Bulletin.

Quantity and quality are not necessarily irreconcilable in milk. Many Jersey cows with large butter records are also noted as large milkers—not large as compared with Holsteins, but large for cows that put butter in their milk; but as a rule very rich butter cows are not great milch cows. Nor is it desirable that they should be, where the object aimed at is butter. In this case

the smaller the number of pounds of milk necessary to make a pound of butter the better for the butter-maker. By careful selection and persistent breeding for that purpose it is easily within the power of any first-class breeder to establish two distinct strains of Jerseys, one producing a moder-ate or small quantity of milk very rich in butter; the other giving a copious flow (forty to sixty pounds at flush) of milk containing a good per cent. of butter. There are conditions in which the larger milkers would be more desirable, because more profitable. But Jersey breeders in general will find their interest lies in breeding to increase the quantity of butter without increasing the flow of milk.

Treatment of Young Fruit Trees.

Philadelphia Record.

Much depends upon how the young trees are managed the first year after they are planted. Severe cutting back is beneficial to the peach-tree, and cases are known in which old trees have been induced to make new growth and continue bearing, even when nearly gone, by cutting all of the old wood away above the trunk. Low, stocky trees stand the winds better and the fruit is easily picked, but the cultivator cannot be used to advantage as among tall trees. The failure to cut back severely the first year, however, often results in but little new wood and a poor start for the young tree, which should be guarded against, as the future of the tree depends The greater the work done by the roots the more rapid the growth of the tree; but there is such a thing as giving the roots more than can be done. By cutting back the young tree at the time of setting it out, and allowing but a few shoots to grow, the power of the roots will be thrown into them, and as the roots will not be overthem, and as the roots will not be overtaxed, the tree will at once begin to grew, and grew rapidly, each shoot pushing forward as if to excel the others; but when too much top is left on, each shoot of the many will draw upon the roots and the result will be that but little growth will be made, while the tree will be slow in coming into bearing later on. By securing as much growth as possible the first year the future

shape and trimming of the tree can be done to better advantage, and this is effected only when the young tree is allowed to grow from a limited number of shoots, and when it is cut back so as not to impose too much duty on the roots. The young orchard should be kept clean washboards, \$1.50@1.85; clothes pins, 50@

the first year, and the more frequently it is cultivated the better. Grass should not be allowed in a peach orchard at any time, though on rich soil grass is sometimes grown in pear and apple orchards, but only after the first year. Unrotted manure is too teel, 5c. heating for young trees, and the best manure is that which has been composted. What is better, however, is an application of wood ashes every spring, applied liberally, after the first year, with one hundred pounds of superphosphates in the fall. Young trees so treated will thrive, provided the very important work of destroying insects of all kinds is carefully attended to.

It is suggested by an Eastern writer that in the agricultural districts botany should be a study in the public schools, and that one day in the week should be given up to lectures on soils, plants, breeds of stock, cultivation, fertilizers, etc. Such studies are not uninteresting to children who are accustomed to the farm, and they would quickly comprehend the lectures from the aid imparted by every-day experiences. No doubt such studies would be of much benefit to the coming generation and lead benefit to the coming generation and lead to better systems of farming.
